

CONTENT OF PMP VOLUME 7 (2007)

No 1		
PAPERS		
A. Liersch, H. Danninger, Ch. Gierl, R. Ratzi	The Role of Admixed Hexagonal Boron Nitride in Sintered Steels 1. Effect on Sintering and Microstructure	1
M. Campos, L. Blanco, J.M. Torralba	Effect of Green Densification Mode on Fracture Surface Micromechanisms in Low Alloyed Molybdenum Sintered Steels	12
M. Kabátová, E. Dudrová, A. Wronski, R. Bidulský	Fatigue Crack Initiation and Short Crack Growth in Sintered Fe-1.5Cr-0.2Mo-0.7C Steel	20
M. Kupková, M. Kupka, S. Strobl, C. Gierl, J. Wagesreither	On the Unusual Dimensional Response of Compacted Copper-Coated Iron Powders to Sintering	35
A. Turoňová, M. Gálová, M. Gernátová	Preparation of the Copper Coatings on Fe Powder by Electroless Plating Technique	44
J. Trpčevská, W. Žorawski, D. Jakubéczyová, J. Briančin, E. Zdravecká	Investigation of Microstructures of Plasma and HVOF Sprayed Carbide Coatings	52
No 2		
PAPERS		
S. Firstov, T. Rogul	Theoretical (Ultimate) Hardness	61
A. Liersch, H. Danninger, R. Ratzi	The Role of Admixed Hexagonal Boron Nitride in Sintered Steels 2. Effect on Sliding Wear and Machinability	66
M. Sulowski	How Processing Variables Influence Mechanical Properties of PM Mn Steels?	80
F. Baumgärtner	Use of Acoustic Emission Analysis for Material- Testing Aluminum Foams	92
A. Fedorková, R. Oriňáková, M. Kupková, E. Dudrová, M. Kabátová	Corrosion Behaviour of Coated Hollow Spheres in Acetate Buffer with KCl	103
S. H. Kayetbay, W. M. Daoush	Phase Identification and Magnetic Properties of Nanocrystalline $\text{Fe}_{50}\text{Cu}_{50}$	111

No 3		
PAPERS		
S. Sainz, W. García, A. Karuppannagounder, F. Castro	Microstructural Development During Sintering of PM Steels with Admixed Nickel	121
M. Azadbeh, H. Danninger, Ch. Gierl	As-Repressed Properties of Double Compacted Cr-Mo and Mo Prealloyed PM Steels	128
A. Ciaś, A. S. Wronski	Comparison of Mechanical Properties of Manganese Steels Based on Sponge and Atomised Iron Powders	139
A. Liersch, H. Danninger, R. Ratzi	The Role of Admixed Hexagonal Boron Nitride in Sintered Steels 3. hBN in Differently Sintered Alloy Steels	149
M. Selecká, A. Šalak, R. Bureš, L. Parilák	Formation of Boride Layers on PM Steels During Sinter Boriding	164
SHORT COMMUNICATIONS		
	Deformation and fracture in Structural PM Materials DF PM 2008	173
	Fractography of Advanced Ceramics	176
No 4		
PAPERS		
E. Hryha, L. Čajková, E. Dudrová	Study of Reduction/Oxidation Processes in Cr- Mo Prealloyed Steels During Sintering by Continuous Atmosphere Monitoring	181
R. Bureš, M. Fáberová	Heat treatment influence on carbide phase distribution and hardness of PM HSS with niobium addition	198
A. Kovalčíková, J. Dusza	Effect of Annealing on the Microstructure and Mechanical Properties of Liquid-Phase-Sintered Silicon Carbide	205
V. Brožek, J. Matějíček, K. Neufuss	Behavior of Tungsten Carbide in Water Stabilized Plasma	213
S. Gyurov, J. Georgiev, M. Selecká, E. Bendereva, R. Valov	Study on the Carbothermal Reduction of Coated with Hydrocarbons Powdered WO_3 in the Temperature Interval 20-1000°C	221
I. Petean, G. Arghir, I. G. Daian, L. Brandusan	Nano Quantitative Metallography Investigation on the Mechanical Alloyed Fe5Co95 Composition	230
SHORT COMMUNICATIONS		
	Content of PMP Volume 7 (2007)	238
